

# 7 LAYERS OF CYBERSECURITY

1

## Human

One of the biggest risks begins with your team and their level of understanding. We can educate your team with our [PCA Cybersecurity Awareness Training](#). This will include regular education, updated cybersecurity techniques, vulnerability identification, compliancy, and more.

## Perimeter

Are you looking for a firewall solution for your unique business needs? PCA's trusted partner, [WatchGuard](#) offers a full portfolio ranging from physical tabletop and rack-mounted models to Cloud-based solutions.

2

3

## Network

Another PCA trusted partner, [Datto](#) has a Remote Monitoring & Management ([RMM](#)) solution to collect information about your network and proactively monitor every endpoint. It can deploy patches, create alerts and tickets when issues arise, schedule maintenance jobs, and more.

## Endpoint

Endpoint security should prevent, detect, contain, and respond to threats. PCA services paired with [leading IT](#) from WatchGuard will provide an all-in-one defense to eliminate your #1 risk.

4

5

## Applications

Protect the data in your Office 365 or G Suite applications with [Datto SaaS Protection](#). Easy to use, automated, affordable, and secure at both the application and infrastructure level.

## Data

Your assets are valuable. [Datto BDCR](#) provides peace of mind and protection for every data loss scenario. It runs every five minutes with verification to ensure backups boot correctly and are always intact.

6

7

## Mission Critical

Need help? If you're looking to partner with a true IT ally, PCA is here to help. We offer a [Cybersecurity Portfolio](#) that's ready to be put into action today.
