

WatchGuard® FIREWALL

PCA's trusted partner, WatchGuard Technologies offers a full portfolio of Firebox appliances ranging from physical tabletop and rack-mounted models to virtualized and Cloud-based solutions. We can find the best firewall solution for your business needs!

WHAT MAKES WATCHGUARD'S SECURITY SERVICES STAND OUT?

Budget-friendly, easy to configure, and the ability to centrally manage.

Simplicity

Industry leading sales and service support to ensure maximum satisfaction.

Support

Meet compliance needs and experience the fastest UTM performance on all models.

Performance

BASIC VS. TOTAL SECURITY

BASIC SECURITY

Includes all of the traditional network security services typical to a UTM appliance such as: IPS, antivirus, URL filtering, application control, spam blocking and reputation lookup. It also includes centralized management and network visibility capabilities, as well as 24/7 support from PCA.

TOTAL SECURITY

Includes all services offered with the Basic Security Suite plus AI-powered malware protection, enhanced network visibility, endpoint protection, Cloud sandboxing, DNS filtering, and the ability to take action against threats right from the Cloud as well as 24/7 support from PCA.

Best-selling models for small businesses include the T20, T35, T40, T80, M370, and M470 models. Contact PCA today to learn more!
